

► PANDI CIRCULAR 028/2020 PARANA RIVER LOW WATERS SHIPOWNERS - UKC

Further to our Circulars 23/2020 and 26/2020 (attached for your easy reference), a new warning has been issued today by the Argentine Coast Guard in relation to the UKC, especially bearing in mind that due to the COVID-19 scenario the clearance of vessels is mainly performed remotely. Although there have not been recent groundings in the past couple of weeks - especially after the peak last May- the levels of water in the river would not improve significantly in the near future in accordance with the information forecasted by INA (National Water Institute). Therefore, we recommend Masters to be alert in relation to the compulsory UKC, also bearing in mind the squat effect of the vessels when transiting restricted waters as our channels in the Parana River/River Plate are.

Yours Faithfully,

PANDI LIQUIDADORES SRL

BUENOS AIRES, ARGENTINA

This circular update Circulars 023/2020 and 026/2020.
